

Managing sustainable cities and communities

Learning from all urban stakeholders

Networking Event - Hall 3, Room 14, Abu Dhabi Exhibition Center

Tuesday, 11 February 2020, 16:30 - 18:30

International Federation of Consulting Engineers in association with UN-Habitat, ICLEI, DGNB, One Planet Network, ISO Technical Committee 268, & Global ABC

The sustainable development of communities, cities and regions is important for community leaders, mayors, governments, and the citizens they represent.

The International Standards Organization's multi-actor, multi-disciplinary governance and management standards for sustainable cities and communities lie at the heart of the built environment sector's response to the rapidly growing demand for a structured approach to urban sustainability.

The ISO 37101 sustainable development in communities standard builds upon a well-established approach comprising a series of interlinked, iterative phases involving continual improvement coupled to a community's lifecycle-based decision making process.

ISO 37101 aims to guide an integrated, holistic management of sustainable development policy and practice, to ensure consistency, establish relevance and priorities, assess progress, and provide a channel to communicate achievements.

The event aims to engage with communities, developers, built-environment sectors and other urban stakeholders to map out the further development of tools, protocols, guides and management systems for sustainable urban development within a wide range of contexts. These range from infrastructure and building projects, city centres and business districts, cultural sites, neighbourhoods, and other types of communities, through to towns, cities and regions.

There will be a special focus on implementation by local authorities in cities and districts, and by project developers in contexts where an urban project development supports either a formal ISO 37101 management approach or a structured commitment.

Programme

Moderator: Martina Otto, *Global ABC*

Dyfed Aubrey, UN-Habitat

The role of community and urban certification

Giorgia Rambelli, ICLEI - Local Governments for Sustainability

Implementation of ISO 37101 & related standards for sustainable development in communities

Christine Lemaitre, DGNB - German Sustainable Building Council

The DGNB city district certification scheme

Pekka Huovila, Sustainable Buildings & Construction, One Planet Network

Urban sustainability management: procuring circular and resilient neighbourhoods

Jeshika Ramchund, FIDIC - International Federation of Consulting Engineers

ISO 37109 - the developers guide to the ISO 37101 urban sustainability management standard

Peter Boswell, ISO TC268 - International Standards Organization

The ISO 37101 sustainable city pilot programmes
